SUMMARY

Information Technology undergraduate with an 8.07 CPI and hands-on experience building AI-powered, full-stack, and machine learning applications. Skilled in Python, Java, React, Node.js, Express.js, MongoDB, and Machine Learning, with practical experience developing hackathon solutions and deploying web applications. Interested in Artificial Intelligence, Full-Stack Development, Cloud Computing, and Software Engineering.

EDUCATION

Parul Institute of Engineering and Technology, Parul University

B.Tech – Information Technology, Semester Performance:, Sem 1: 8.25 | Sem 2: 8.05 | Sem 2024 – 2028 | Current CPI: 8.07
3: 7.82 | Sem 4: 8.22

EXPERIENCE

AI Training / Internship

Corizo

- Completed an AI-focused training/internship program.
- Worked on practical concepts related to Artificial Intelligence and Machine Learning.
- Recognized among the top performers during the program.

PROJECTS

CurriCraft AI – Unified AICTE Model Curriculum Portal | React.js | TypeScript | Node.js | Express.js | MongoDB | Google Gemini AI

- Developed an AI-powered curriculum platform designed around the AICTE model curriculum and Smart India Hackathon 2026 problem statement SIH1465.
- Integrated Google Gemini AI for syllabus generation, Bloom's Taxonomy classification, and industry skill-gap analysis.
- Implemented a deterministic NEP 2020 compliance engine for curriculum auditing.
- Built role-based access control, curriculum approval workflows, version snapshots, syllabus comparison, and public curriculum browsing.
- Deployed the application as a live web application.
- GitHub: <https://github.com/Prajwal7387/AICTE-CurriCraftAI>

Cultiv8 – Farmer-Buyer Marketplace | React | Node.js | Express.js | MongoDB/Supabase

- Built an MVP marketplace connecting farmers directly with buyers to improve price transparency and reduce dependence on intermediaries.
- Implemented crop listings, market-price insights, buyer interaction, and farmer-focused information features.
- Designed the solution for low-bandwidth and farmer-friendly usage.
- Developed as a team project for the PU Code Hackathon.

Cardiovascular Disease Prediction | Python | Pandas | NumPy | Scikit-learn | Matplotlib | Seaborn

- Developed a machine learning system to predict cardiovascular disease from medical and lifestyle attributes.
- Performed data preprocessing, EDA, correlation analysis, feature scaling, and model comparison.
- Evaluated Logistic Regression, KNN, SVM, Decision Tree, and Random Forest models.
- Selected Support Vector Machine (SVM) as the best-performing model.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, HTML, CSS

Frontend: React.js, Vite, Tailwind CSS, Three.js

Backend: Node.js, Express.js, Django REST Framework, Flask

Databases: MongoDB, MySQL, SQLite

AI / Machine Learning: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Google Gemini AI, SVM, KNN, Random Forest, K-Means, PCA

Tools & Platforms: Git, GitHub, VS Code, Google Colab, Render, Vercel

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Leadership & Soft Skills: Problem Solving, Team Collaboration, Communication, Adaptability, Quick Learning, Analytical Thinking, Project Development

CERTIFICATIONS

AI-related training/internship – Corizo

Python certification – IBM

JavaScript certification

HTML/CSS certification

AWS / Cloud-related learning and participation certificates

ACHIEVEMENTS & ACTIVITIES

Participated in PU Code Hackathon with the Cultiv8 project. Developed solutions for Smart India Hackathon 2026 problem statement SIH1465. Active participant in coding and technical events. Solving programming and DSA problems on LeetCode. Participated in AWS/cloud-focused technical events and student communities.

INTERESTS

Artificial Intelligence • Machine Learning • Full-Stack Development • Cloud Computing • Competitive Programming

DECLARATION

I hereby declare that the information provided above is true to the best of my knowledge.
